

# EVERY DETAIL.

## ROADRELAY™ 4

**THE FACTS YOU NEED  
WHEN YOU NEED THEM**

## What Every Driver Needs To Know.

Want to increase mpg? Reduce idle time? Improve delivery performance to your customers?

RoadRelay™ 4 gives every driver the means to accomplish all this, and more. They get the feedback they need – on the road, while they are driving – to improve their driving habits and save you money on every trip. Here are just some of the features of RoadRelay 4:

### Expanded Trip Information:

RoadRelay 4 displays and records the information you need like fuel, miles and engine hours spent in idle, PTO and other operating modes. Plus, it allows you to analyze specific, user-definable routes (i.e., from your loading dock to a customer location) with the new Route Recorder feature. With RoadRelay 4, you're in charge of what constitutes a "trip."

### Improved Safety Measures:

RoadRelay 4 protects you by recording the number of Panic Stops, as well as seventy-five seconds of detailed vehicle data – rpm, mph, and brake and clutch activity for the last three panic stop events. With the real-time clock, you'll know exactly when they occurred. And, with the optional GPS feature, you'll be able to pinpoint the exact location (longitude and latitude) of a panic stop.

### Better Vehicle Protection:

When an unexpected event happens inside your engine, RoadRelay 4 informs your driver, and tells him how to minimize potential damage. It also tracks customizable service intervals for oil changes, filter changes and tire rotations, notifying your driver when it's time to head for the shop.

**Easy Visibility:** RoadRelay 4 has a four-line display that's easy to read and automatically dims itself when the vehicle headlights are turned on for night driving. There's a brightness control you can adjust, and the twelve keys are backlit for easy viewing, day or night.

## INTELECT™ Makes Technology Work For You.

Your local INTELECT technology team can add more valuable features for your RoadRelay 4. Things like:

Antitheft – no password, no start. It's that simple.

State fuel tax mileage – are you missing out on fuel tax deductions because you don't have the information you need – by state? RoadRelay 4 helps you get it – every time.

Training and extended warranty packages – get the most out of your investment.

## So Easy, Everyone Can Use It.

You don't need a technician or a complicated service tool to get information out of RoadRelay 4. INFORM™ or INSPEC™ software make data easy to access and read. Anyone can download the information they need. An optional scrolling message sign takes downloaded information and presents it in a larger, more easily viewed format.

You can download data quickly and easily at your fuel island or service bay. Combine Road Relay 4 with INFORM's Exception Reporting, and you can isolate problems fast – without a mountain of paper. You can even have your favorite reports generated automatically, when you need them. You'll know which drivers are having trouble reaching mpg goals, or who is idling more than the corporate average. In a matter of minutes.

## Works With Every Electronic Engine.

You can use RoadRelay 4 for every electronic engine in your fleet, regardless of the make or age. So even with a mixed fleet, you can still compare performance and improve productivity using a single software program.

## Every Question, Answered.

For more details about RoadRelay 4 or any Cummins hardware, software information or management products, see your local Cummins distributor or call 1-800-DIESELS (1-800-343-7357).
