

**EVERY CHOICE.
GENUINE.**

**CUMMINS MIDRANGE
OVERHAUL PROGRAM**

The Best On Every Level.

Cummins MidRange engine customers can choose from three different levels:*

- Level One** Cummins Basic Overhaul
- Level Two** Cummins NOW[®] Overhaul
- Level Three** Cummins ReCon[®] Engine

Level One: Cummins Basic Overhaul.

If your engine just needs a basic overhaul, there's a genuine advantage to using Genuine Cummins Overhaul parts. Every overhaul part is engineered with the latest improvements, built and tested to meet rigid Cummins quality standards. Plus, they come with a full factory warranty backed by the largest parts/service network worldwide, with over 5,500 locations. These warranties cover 100% parts and labor, for up to 6 months with unlimited miles, kilometers or hours. The benefit is long-lasting performance you can depend on, for years to come.

Cummins makes the overhaul even simpler and more affordable by offering all the parts needed for an overhaul in one box – Overhaul Kits that can be ordered by one part number.

Engine Family	Overhaul Kit Fleet Pricing As Low As
B3.9	\$723
B5.9	\$1,012
C8.3/ISC	\$1,736

*Check with your Cummins dealer or distributor for complete pricing details on all three levels.

Level Two: Cummins NOW[®] Overhaul.

When you want a comprehensive overhaul, consider the Cummins NOW Overhaul.* It includes a complete teardown and inspection of key engine components, replacement as needed with Genuine Cummins new and ReCon parts. Cummins trained and certified technicians perform the work, and you get a nationwide warranty that's good for 2 years/100,000 miles (160,935 km) or 2,000 hours on replacement parts, inspected parts and installation workmanship related to the covered parts. This program will give you all the confidence and peace of mind that you need.

*The NOW Overhaul is available for C8.3, ISC, QSC, ISL and QSL engines and covers overhauls performed at a select group of certified dealers and distributors, and comes with a comprehensive National Overhaul Warranty. See Bulletin 4021552 for more details.

Level Three: Cummins ReCon[®] Engine.

When you need an overhaul but can't afford the downtime, consider this alternative: a Cummins ReCon engine. In less time than an in-frame overhaul, you can have a completely remanufactured engine, built and tested to Cummins performance standards, installed in your equipment and ready to run.

Unlike used engines that can't be trusted, Cummins ReCon engines are totally stripped down, each component is cleaned, examined and checked, worn parts are replaced with new ones, and the engine is remanufactured on a factory assembly line. Then every engine is tested to ensure proper performance, and backed by a full warranty for up to 2 years or 100,000 miles (160,935 km). You can even purchase an extended warranty good for up to 5 years/300,000 miles (482,804 km), whichever comes first.

We spend a lot of extra time building Cummins ReCon engines. You gain a lot of time buying and running them.

Every Order. Made Easy.

Rather than having to look up and order each part separately, you can now order complete Overhaul Kits with just one part number. To ensure that you are getting the right parts, go to a nearby authorized Cummins parts and service location with your engine model and year or, better yet, your engine's serial number (the ESN can be found on the engine data plate mounted to the gear housing). Or, place your order with a local Cummins dealer or distributor using QuickServe® Online, at <http://quickserve.cummins.com>.

Every Answer.
