

EVERY DETAIL.

ROADRELAY™ 4

FOR MOTORHOME OWNERS

RoadRelay™ 4. What Every Motorhome Driver Needs To Know.

Want to know your mpg? How far it is to your destination? Need to check your service intervals?

RoadRelay™ 4 gives you the ability to do all this and more. You get every detail you need – on the road, while you are driving – to be in complete control every minute and every mile of every trip. Here are just some of the features of RoadRelay 4:

Trip Detail:

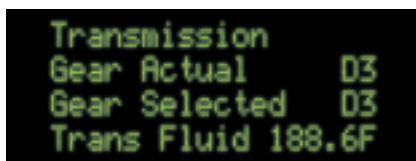

RoadRelay 4 displays and records information like miles per

gallon, average speed, coolant temperature and more. It will even remind you when service is due for oil changes, filters, tire rotations, or whatever you choose with four customizable prompts. Plus, it allows you to analyze specific routes (i.e. from your home to a campsite) with the new Route Recorder feature.

Improved Safety

Measures: When you're running through the mountains or

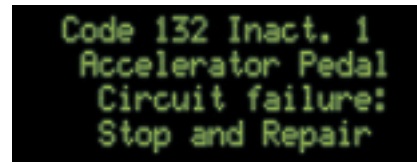

towing a heavy vehicle, you want to make sure that you don't overstress your drivetrain. That's why RoadRelay 4 displays both the gear you've selected and the actual gear your motorhome is running in, as well as your transmission fluid temperature. It can even monitor the performance of your AntiLock Brake (ABS) system. You stay calm, cool and collected, because you're in control. Every minute and every mile.

Antitheft Protection: No password, no start. It's that simple when you activate the antitheft feature on Cummins RoadRelay 4. So your motorhome will be right where you left it. Every time.

Better Engine Protection:

RoadRelay 4 helps make every trip

worry-free. If you encounter an engine problem on the road – even a temporary one – RoadRelay 4 displays the fault code and tells you immediately what the problem is – and what you need to do about it. RoadRelay 4 automatically stores this information so that any qualified technician can quickly and accurately perform the needed repair and get you back on the road. Saving you time – and money.

Easy Visibility:

RoadRelay 4 has a four-line display that's easy to read

and automatically dims itself when the vehicle headlights are turned on for night driving. There's a brightness control you can adjust, and the twelve keys are backlit for easy viewing, every hour of the day or night.

Every Question, Answered.

For more details about RoadRelay 4, plus our Power Assist and Coach Care™ programs for motorhome owners, please contact your local Cummins dealer or distributor. Or call toll-free 1-800-DIESELS (1-800-343-7357). Additional details can be found at www.everytime.cummins.com and www.roadrelay.cummins.com.
